SUMMARY

Full-Stack web development student with hands-on experience in building responsive and dynamic web applications using the MERN stack. Strong foundation in Java, Python, and Data Structures with practical exposure to real-world projects and hackathons. Focused on developing scalable applications and actively seeking internship opportunities to apply full-stack development skills.

EDUCATION

2026 - present	B.TECH (CSE) at SIET	(GPA: 8.22/10.0)
2023	Class 12th at NARAYANA JUNIOR COLLAGE	(9.4/10.0)
2021	Class 10th SSC	(10.0/10.0)

SKILLS

Programming	Java, Python, C, JavaScript, PHP
Web Development	HTML, CSS, JavaScript, MERN Stack
Databases	MySQL, MongoDB
Core Concepts	DSA, OOP, DBMS
Other Skills	Cloud Computing (Basics), AI (Basic Understanding)

PROJECTS

Full-Stack Web Application (MERN Stack)

[Link to Demo](#)

Developed a full-stack web application using the MERN stack (MongoDB, Express.js, React, Node.js) to handle dynamic user interactions and data management. Built a responsive frontend using React and implemented backend APIs with Node.js and Express for handling requests and server-side logic. Integrated MongoDB for efficient data storage and retrieval, focusing on scalable architecture and clean user interface design

Hangman Game – Python (Tkinter GUI)

[Link to Demo](#)

Built an interactive word guessing game using Python and Tkinter, implementing real-time gameplay logic and event handling. Designed a graphical user interface to enhance user interaction and incorporated win/loss conditions to create an engaging user experience

VoxSnap – Anonymous Polling Web Application

[Link to Demo](#)

Developed a web-based anonymous polling platform that allows users to create and participate in polls with image and text options. Implemented features such as random usernames and avatars to maintain user anonymity, and designed a responsive interface focused on usability and privacy. Built using HTML, CSS, and JavaScript with a focus on clean UI and smooth interactionn

ACHIEVEMENTS

- Ranked Top 15 out of 75 teams in a competitive hackathon
- Earned NPTEL Elite Certification in Java Programming
- Participated in hackathon conducted by CBIT and worked on IoT-based solutions
- Completed Full Stack Development Bootcamp Certification
- Selected for SIH 2025 (First Round) for developing an AI-based mental health chatbot for students
